

## LIMITED WARRANTY POLICY

Victron Energy warrants its products to be free from defects in workmanship and materials for a period of:

Batteries: 2 year limited warranty

Li-ion batteries: 3 year limited warranty

All other products: 5 -year limited warranty.

(See end of document for products that fall under this 5-year limited warranty policy.)

As determined from the date of purchase by the end user, with a maximum of 66 months from the Victron Energy invoice date.

During this period, Victron Energy will, at its option, repair or replace the defectuous product free of charge. This warranty will be considered void if the unit has suffered any physical damage or alteration, either internally or externally, and does not cover damages arising from improper use like:

- Reverse of battery polarity.
- Inadequate connection.
- Mechanical shock or deformation.
- Contact with liquid or oxydation by condensation.
- Use in inappropriate environment (dust, corrosive vapor, humidity, high temperature, biological infestation...).
- Breakage or damage due to lightning.
- Connection terminals and screws destroyed or other damages, like overheat, due to insufficient tightning.
- For any electronical breakage except due to lightning (reverse polarity, over-voltage due to external cause), the state of the internal control diode and of the inputs/output X and Y capacitors determine the warranty.

This warranty will not apply where the product has been misused, neglected, improperly installed, or repaired by anyone else than Victron Energy or one of its authorized Qualified Service Partners. In order to qualify for the warranty, the product must not be disassembled or modified.

## **LIMITED WARRANTY POLICY**

Repair or replacement are our sole remedies and Victron Energy shall not be liable for damages, whether direct, incidental, special, or consequential, even caused by negligence or fault.

Victron Energy owns all parts removed from repaired products. Victron Energy uses new or reconditioned parts made by various manufacturers in performing warranty repairs and building replacement products. If Victron Energy repairs or replaces a part of a product, its warranty term is not extended. In case of replacement the new component has a warranty of 6 months, without effect on the initial warranty period.

All remedies and the measure for damages are limited to the above.

Victron Energy shall in no event be liable for consequential, incidental, contingent or special damages, even if having been advised of the probability of such damages. Any and all other warranties expressed or implied arising by law, course of dealing, course of performance, usage of trade or otherwise, including but not limited to implied warranties of merchantability and fitness for a particular purpose, are limited in duration to a period of two (2) years from the date of purchase for batteries and five (5) years from the date of purchase for all other products.

### **Life Support Policy**

As a general policy, Victron Energy, does not recommend the use of any of its products in life support applications where failure or malfunction of the Victron Energy's product can be reasonably expected to cause failure of the life support device or to significantly affect its safety or effectiveness. Victron Energy does not recommend the use of any of its products in direct patient care. Victron Energy will not knowingly sell its products for use in such applications unless it receives in writing assurances satisfactory to Victron Energy that the risks of injury or damage have been minimised, the customer assumes all such risks, and the Liability of Victron Energy is adequately protected under the circumstances.

### **Warranty Service**

The execution of the warranty services will normally be carried out by the Qualified Service Partner authorized by Victron Energy for the replacement of every parts or any faulty element which does not need special adjustments.

Victron Energy assures the exchange of faulty elements or the reparation at the factory. The beneficiary of the warranty must provide all the needed information on the form ad hoc.

As a product requires service, it must be brought back to the place of purchase. In case no contact can be taken with the merchant, or if he is either unable or not allowed to provide service, direct contact should be taken with Victron Energy.

## LIMITED WARRANTY POLICY

In the same time, the serial number of the product, the date of purchase and the name of the merchant will be required. The faulty material must be sent - at the sender own expenses back to our closest Qualified Service Partner (address upon request) or to our factory.

### Warranty on repairs

The warranty period on products or on printed circuits boards repaired by Victron Energy as well as on printed circuit boards for replacement is 6 month from delivery by Victron Energy.

CAUTION: inverters are heavy materials. The transport must be organized in a way to avoid any damage, especially when a single unit is sent. More than this, the warranty can be applied only if the product is returned with its individual Return form.

### Severability

If a part of the terms and conditions set out above is held invalid, void or unenforceable due to any particular national or international legislation, it shall not affect other parts of the terms and conditions remaining.
